

AIR CASTERS

Air casters is an innovative alternative when it comes to machinery movement particularly where the environment or the load is of a sensitive nature.

Moving sensitive or high value loads requires meticulous planning and the right equipment, air casters utilises compressed air delivered to the bearing pads so the load is lifted and like a hovercraft sits upon a film of air.

With the load on the air casters movement and positioning the load with ease.

The advantages of air caster technology:

- Low profile
- Low friction
- Omni-directional
- Prevents floor damage
- Ideal for clean room environments

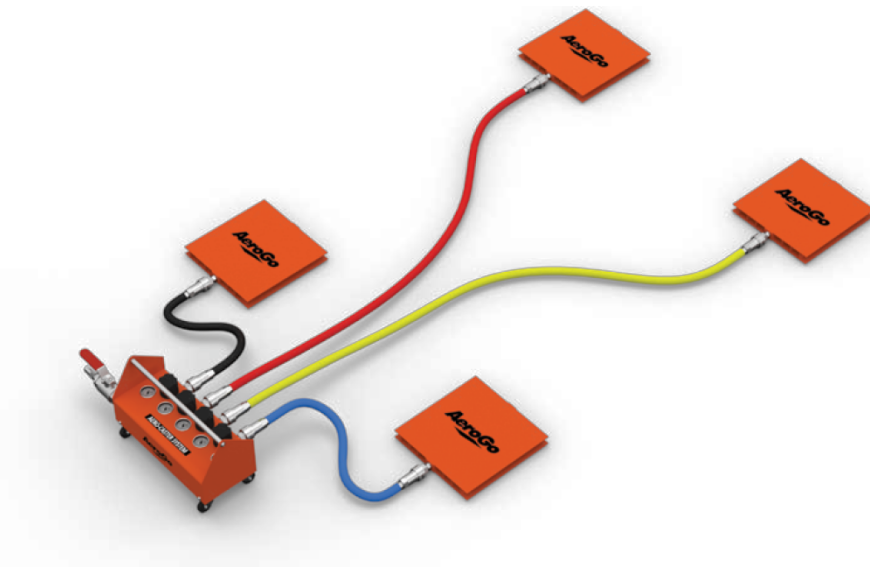

Aero Go are the leading manufacturer of air technology load movement equipment since 1967, based in Seattle Washington Aero Go have extensive engineering and manufacturing facilities with ISO 9001 accreditation.

System specifications:

- Model # AHS-4K15NDL
- System capacity WLL 15t
- Air castor dim
384 x 384 x 48mm
- Rated pressure (kg/cm) 4.2
- Effective lift 22mm

Also available for rental:

- Toe jacks
- Hydraulic cylinders
- Hand pumps
- Electric pumps
- Manifolds
